Spinal cord stimulation for patients with failed back surgery syndrome or complex regional pain syndrome: A systematic review of effectiveness and complications. Barrack, MD; Jonathan P. Neurol Res.

These adhesions may cause back and leg pain by compressing nerve roots, decrease
Radicular symptoms in the failed back patient may be due to a multitude of reasons including herniated disc, postoperative adhesions, a thickened ligamentum flavum, spondylolisthesis with or without an associated pars defect, osteophyte formation from facet arthropathy or other degenerative changes that may lead to central or transforaminal stenosis. Treatments include antiepileptics, Non-steroidal anti-inflammatory drugs, oral steroids, antidepressants, and opioids.

Improved outcomes Spinal cord stimulation in the treatment of neuropathic
Sep 28]. Biofeedback has been a trusted physical therapy modality for decades, but despite its many accolades, its delivery system has been left in the 20th century.
