The responsibility only has access to the programs in the request set assigned to it. The output file is used to produce output for the user to see what has been processed and the log file is used to write more technical or debugging messages, which may not necessarily be understood by the end user. The examples are designed to be worked through, and start right from scratch. Select and drag the items on the canvas so that there is space at the top and bottom and as well as space on either side of the objects on the canvas, as shown in the following screenshot: 4. We have tested the form to ensure that the changes we have added are present in the latest version of our form. The first four parameters in the host file are reserved for oracle. Click on the Submit button and when prompted to submit a new request, select No a master block and container objects. The version of developer suite required is dependent upon the version of Oracle EBS that is installed.
